MN-10 RECEIVER

from \$499.00

One of our more popular units for the past 30 years, the MN-10 is familiar, easy to use, and reliable. Covering 100KHz within a given frequency, users have the capability of tracking up to 10 transmitters on one unit. Each channel consists of 10KHz of coverage to allow for a fine tune for clear and precise tracking abilities.

Optional: Add the Dual Function Meter (DFM) to get a lighted meter with a battery tester.
